Potential competing interests: No potential competing interests to declare.

A good paper. Secure II unlocks the power of AI and certainly can assist entrepreneurs to be more agile to market needs. Some sections are descriptive which needs improvement.

The following issues need to be addressed. (highlighted ones)

Secure 1 is not a new business model as stated in the introduction. (It was first published in 2020).

Font needs a change in this sentence - According to Wamba-Taguimdje et al. (2020),**the** informational effect

This sentence can be better written - As**we live** in a world of hyper-connectivity and hyper-automation where the industrial

Spelling & Referencing - However, **Dep** Learning models' mathematical and computational methodology is complicated to decipher, especially for interdisciplinary scientists ((**Emmert-Streib** et al., 2020).

Writing in third person would be better - Hence, we've come up with the following research questions

Not clear - **Per the precedent** set by Morande (2022), the prediction made using Machine Learning were corroborated for their validity and reliability.

From this research model, **we focus** on AI use for *greater precision, reduction of human errors, and improved decision quality*(evaluation of ex-ante measures), which influences proposed *firm performance* (ex-post measures).

Lacks clarity --On the same lines**resented research, Neuro** Symbolic AI reflects Entrepreneurial Startup
