Ataxia-telangiectasia

INSERM

Source

INSERM. (1999). Orphanet: an online rare disease and orphan drug data base. Ataxia-telangiectasia. ORPHA:100

Ataxia-telangiectasia is the association of severe combined immunodeficiency (affecting mainly the humoral immune response) with progressive cerebellar ataxia. It is characterised by neurological signs, telangiectasias, increased susceptibility to infections and a higher risk of cancer.
