Potential competing interests: No potential competing interests to declare.

In the first part the authors presented Introduction and Preliminaries and related results from the literature. In the Second and Third parts they proved the main results, they introduced the concept of pre- γ -regular and minimal pre- γ -open sets. Further characteristics of minimal pre- γ -open sets are studied with FINITE PRE- γ -OPEN SETS. Finally, in section 4 The authors present as an application of there results

Recommendation. I recommend accepting and publishing the paper as its
