Title: Skin related health issues among health care workers due to utilizing of personal protective equipment during COVID-19 pandemic in Pakistan

The paper is written good and has quality. However, I have many concerns in this paper. I need to address all

1. Improve the English of the whole paper
 2. Avoid typos and grammar mistakes
 3. Highlight the novelty
 4. From which source you have collected the data
 5. What are the strong points that you have been presented, even the other could not performed
 6. Provide some more finding detail in the conclusion
 7. Fig. 1 is so congested, make in such a way that should be clear and easy to understand for the readers
 8. Provide more details of the discussions
 9. The introduction can be improved by using the related references, they must be added in this work
- [Design of a nonlinear Sitr fractal model based on the dynamics of a novel coronavirus \(COVID-19\)](#)
 - [A stochastic intelligent computing with neuro-evolution heuristics for nonlinear Sitr system of novel COVID-19 dynamics](#)
 - [Integrated neuro-swarm heuristic with interior-point for nonlinear Sitr model for dynamics of novel COVID-19](#)
 - [Dynamical analysis of a novel discrete fractional Sitr model for COVID-19](#)
 - [Applications of Gudermannian neural network for solving the Sitr fractal system](#)
 - [Numerical Computational Heuristic Through Morlet Wavelet Neural Network for Solving the Dynamics of Nonlinear Sitr COVID-19.](#)
