

Review of: "Relationship between In Vitro Physical Properties and In Situ Biofilm Formation of Fissure Sealants"

Maria Rigolin

Potential competing interests: No potential competing interests to declare.

Theme and development of the article are very relevant.

Introduction OK.

RESULTS: I suggest leaving just the table and simply comparing in the discussion, and not repeating the results written in the table. Personally, I believe that the table is the best way to present the results.

Item 3.1.4: Leave it as it is.

Discussion: In the material and method, put the 1st paragraph of the discussion.

Discuss the results further with other similar articles!

Conclusion: I suggest focusing more on findings. It is very simple and has no connection with the hypotheses and results obtained!
