The article is confusing and the focus of the study is not clear.

The main objective of this research is to examine the impact of a Management Information System (MIS) on the coffee farm sector in SWER, but in the introduction and literature review section, the specific reasons why coffee farms in the region need management information systems are not properly explained. The conclusions also do not show the possible impact of such systems on this specific sector.

The methodology part, the analyses carried out and the results obtained are absent.
