

Review of: "Approximate Relationships to Reproduce the Values of Shell Correction Energy for Fission Fragments"

Aldo Dall'Osso

Potential competing interests: No potential competing interests to declare.

After revision, the article can be published on Qeios. However, some corrections are needed in the new parts of the article added in Revision 2.

At the end of section III, there is a lost word: "Accor".

In the Summary:

complication calculation => complicated calculations

a large numbers => a large number
