1. Abstract

The background is too short. It should be explain on the main objective of the study. In the methods and results of the abstract, please mention the results that has mentioned in the methods. More information about the highly significant observations should be clarified in the results. You should provide conclusion with focusing on the innovations related to be in a harmony with the title of the manuscript and the objectives of your study.

2. Results

- This part of the result is not displayed well; it needs to be rewritten and organized systematically so that the reader can better understand what the author wants to explain.
- Please standardize the font type. I found that there are different types of fonts used. Please refer to the journal writing format.
- The test results are satisfactory and not sufficient.
- Please label and give the proper title to each figure.

3. Conclusion: More details about your observations by showing some of this valuable study significations point by point should be more clarified.

4. How about method and discussion? Please include both so that this scientific writing becomes more meaningful.
