Potential competing interests: No potential competing interests to declare.

The paper summarizes in an effective way the state of art regarding the implementation of accessibility measures in Indian hospitals. The methodology, results and discussion are exposed in a complete and easy to read fashion.

It is fit for publishing after few minor revisions.

In introduction:

- Please refrain to use terms such as differently-abled, use terms like persons with disabilities or people with disabilities (disregard this note if the term is lifted verbatim from [2])
- When citing [7] elaborate on what is intended as "specialized design" in alternative to universal design
- The last sentence has a typo, in built not inbuilt

In Materials and methodology:

- Elaborate on the methodology used by the survey monkey calculator or, at least, cite the web page describing it <https://www.surveymonkey.com/mp/sample-size-calculator/>
