Potential competing interests: No potential competing interests to declare.

1. Are the teenagers taken in healthy condition?
2. Look at the table results. What do the results mean regarding the use of tobacco?
3. How are they classified or divided according to the different classes for 14,816 respondents taken?
4. When using qualitative analysis, themes must be included that will strengthen the research/survey results.

Thank you. In general, it's good, but do you need a follow-up plan?
