Recommendations for the manuscript "Investigation of Mechanical Properties of Sisal Fiber and Sugar Palm Fiber Reinforced Hybrid Composites"

Abstract

The Abstract can be improved, taking into account methodology and main results.

1. Introduction

Cite some bibliographical references in the first and second paragraphs of the introduction to support the assertions made there. This also applies to the fourth paragraph.

To finish the Introduction chapter, the objective of the work must be mentioned.

2. Materials and Methods

I consider that the first paragraph of the Materials and Methods chapter should not go there; rather, it can be included in the Introduction chapter.

Scientific names of plants should be written in italics.

Check the numbering of the figures. There is no figure 1.2.

In point 2.2, bibliographic references must be cited to support the information given there.

In point 3.1, what does "{m/13}" mean?

3. Results and Discussion

In all the results obtained, bibliographic references must be included for discussion.

Figure 7 is not of good quality.

References

The standards cited in the manuscript should also appear in the References chapter.
