Potential competing interests: No potential competing interests to declare.

1. Spaces between letters and words
2. Page 4, figure 1.2
3. What informed the choice of compositions matrix on page 8? Did you use any optimization software like Minitab to develop the experimental design?
4. Methodology is not supported by references or standards.
5. Section 2.3, hybrid composite preparation. Justify the use of 20% NaOH; is it not on the higher side?
6. Page 10, line 6, after 24 hours. Why so?
7. Figure 7 is a bit blurred.
8. Chapter 4: Do not put methodology in Chapter 4. Take the methodology sections in sections 4.1, 4.2, 4.3, and 4.4 to chapter 3. Chapter 4 should only have Results and Discussion.
9. The Discussion section has only a results description. Scientific explanation and comparison with existing literature are not given.
10. Discuss your results by giving the scientific explanations why results are the way they are, and...
11. Compare your results with the existing literature.
12. Accept the article for publication with minor corrections given above.
