Potential competing interests: No potential competing interests to declare.

This paper discusses economic and social unfoldings of AI. This topic is interesting.

-Some expressions are too absolute., such as "This state of affairs is definitely not positive for a sustainable economic development based on AI". Is it true? Please give evidences in detail.

-The organization of this paper should be included in the Introduction.

-All references are too outdated. And the quality of some references can not support the author's view. Please update.

-Some figures should be offered.
