Dear authors,

Although the paper is intriguing, it needs to be revised for the following reasons:

The lack of an Introduction section makes it unclear what the purpose, subject, thesis, research tasks, limitations, and other details are.

Fig. 1 has to be updated because it is unclear.

The paper needs to be revised because the research is not presented in a scientific manner.

Many words and phrases (like "by the way") ought to be left out. It's unclear how the research was conducted.

Figures 8, 13, and 14 cannot be read.

I recommend expanding the research and refining the paper's structure and content.
