# Malignant atrophic papulosis

INSERM

## Source

INSERM. (1999). *Orphanet: an online rare disease and orphan drug data base*. *Malignant atrophic papulosis*. ORPHA:679

Malignant atrophic papulosis (MAP) is a rare, chronic, thrombo-obliterative vasculopathy characterized by papular skin lesions with central porcelain-white atrophy and a surrounding teleangiectatic rim. Systemic lesions may affect the gastrointestinal tract and the central nervous system (CNS) and are potentially lethal.
