

Review of: "Embedding Covid-safe behaviours into everyday life through an enhanced risk management approach"

Shahbaz A. Shams

Potential competing interests: The author(s) declared that no potential competing interests exist.

- The recommendations should be more detailed, as to how the author suggests embedding these behaviors on a social level. Currently, the data in the article does less in adding to the existing knowledge available.
- There should be a solution-oriented approach where the author addresses the existing challenges in adoption of these behaviors and how to overcome them.
