**Potential competing interests:** No potential competing interests to declare.

This research investigates the **"Design of an intelligent controller for improving the solar system efficiency"** After reviewing the article, I will suggest some improvements and a major revision of this article.

The paper needs to be improved as follows:

1. The abstract should be improved. It is proposed to provide specific quantitative results obtained from the study.
2. The introduction should start from the background of the research and then add the latest, related kinds of literature. Afterward, find the outcomes/limitations of the study and your contributions. At the end of this section, add outlines.
3. All Tables, Figures, Symbols, and Abbreviations should be in the proper formats. Remove spacing between lines, small size, and make it on one page.
4. In the introduction section, propose to highlight why the intelligent controller is selected compared to others.
5. The figures' quality needs to be improved. Try to maintain a similar font size and font for all figures.
6. Try to maintain similarity everywhere. In figures, in a caption, etc., follow the same pattern and font size. Many dissimilarities in the manuscript. Please correct it.
7. In the result and discussion section, propose to add fruitful findings more precisely and adequately with proper justifications.
8. The conclusion strengthens and explains more.
