Potential competing interests: No potential competing interests to declare.

The manuscript important for scientific community and scientifically correct. The subsections and structure of the manuscript are appropriate. The references are sufficient. The English quality of the article suitable for scholarly communications.

Suggestions: These can improve the manuscript-

1. Write the authority of plants *Clematis hirsuta* leaves and *Rhamnus prinoides* in the title of the manuscript as well in the title.
2. The references should be in a single standard format- viz. in reference No. 32 journal name in abbreviated form.
3. Add some recent references as there are only 1 (2022) reference, but no reference from year 2023.
4. Conclusion is very short, it more explanation and relevance of the study.
5. Author required to mention the approval statement of Animal Ethical Committee of the Institute.
