Potential competing interests: No potential competing interests to declare.

This is a very comprehensive policy dialogue with the authors acknowledging the SDGs involved in the challenge of nutrition. For the structure and organisation of the article, the authors can provide a diagram or a map to illustrate the interconnectedness of these goals. In the Call for Action, I was looking for explicit mentions of educational interventions. While this is a policy document, it will be great to utilize the existing empirical evidence to justify the proposed interventions. The impact assessment of these ideas are very much welcomed. Thank you for producing much-needed policy synthesis.
