Diagnostic and Statistical Manual of Mental Disorders, 4th Edition

National Cancer Institute

Source

National Cancer Institute. *Diagnostic and Statistical Manual of Mental Disorders, 4th Edition*. NCI Thesaurus. Code C86966.

Published by the American Psychiatric Association, the DSM is a listing of currently recognized mental health disorders and their diagnostic criteria, for children and adults. It includes statistical information on etiology, incidence, prevalence, age of onset and prognosis. The 4th edition was published in 1994. As new information becomes available subsequent editions are published.
