Potential competing interests: No potential competing interests to declare.

The article's coverage of chatbots lacks an exploration of their multimodal capabilities, their integration with IoT systems, as well as an in-depth examination of data security and ethical considerations. While the core concept of the article is promising, there is significant room for improvement by expanding on these critical aspects. Should the authors endeavor to enhance the article by delving into these facets - the multimodal capabilities of chatbots, their integration with IoT systems, and conducting a comprehensive analysis of data security and ethical considerations - it could substantially bolster the article's merit and likelihood of acceptance.
