Review of Qeios

I made the following comments.

- The title is too wordy with repetition of the word *Economic*
- In the abstract, the methods used to address the problems stated are missing.
- The introduction is a repetition of the abstract.
- The study site of the 3 areas could be further refined and illustrated in detail.
- Methodology is unclear, needs more detail, when was the survey carried? How?
- Results /Discussion should be restructured, Statistical graphs and charts could be used to interpret data collected and thus be easier for readers to understand.
- The conclusion does not reflect the issues raised in the paper but introduces new concept *seg Aquaponics*
- References are too few and not cited in the text.

Sentences should be restructured and interpreted concisely.

On the whole, I recommend a thorough revision and structuring of the whole paper
