I appreciate the chance to examine the article titled "Healthcare Systems Moving Toward Data Governance-Centered Model: India's G20 Presidency in the Wake of COVID." I found it to be a captivating exploration of how the pandemic has reshaped the digital landscape of healthcare. In this era, we are constantly inundated with an array of digital technologies that have become integral to our daily lives. The author provides a comprehensive and in-depth overview of India's governmental initiatives in this context. Nevertheless, I believe that there are a few aspects that, in my view, could enhance our comprehension of these initiatives.
