

# Review of: "Investigations on Input Impedance and Radiation Pattern of a UWB Antenna for Microwave Imaging"

Saad Ijaz Majid

Potential competing interests: No potential competing interests to declare.

1. The abstract could be improved by incorporating objective writing rather than being subjective. Also, the writing needs revision.
2. References may be updated with the latest ones; avoid too old references. Keep the reference format uniform and revise for typing mistakes.
3. Please clearly mention your output results and their comparison to the available latest literature.
4. Please clearly indicate your contributions.
5. Some mathematical expressions/values/symbols, for some reason, are not readable.
6. It is suggested to make the parameters italic to make them distinct.
7. Please further elaborate on your results given by the figures and tables.
8. Paper writing needs revision to make it more elaborate and easy to understand.
9. The conclusion is not clear.
