Atrioventricular Nodal Reentry Tachycardia by ECG Finding

National Cancer Institute

Source

National Cancer Institute. Atrioventricular Nodal Reentry Tachycardia by ECG Finding. NCI Thesaurus. Code C35058.

An electrocardiographic finding of a regular supraventricular tachycardia due to reentry within the AV node. It is characterized by P waves which typically occur nearly simultaneously with the QRS complex, resulting in a P wave which is obscured by the QRS, merged with the QRS or which may follow the QRS. (CDISC)
