First, I would like to appreciate the Authors who have struggled to write the article. In this good opportunity I was requested by the Qeios to review the article which is entitled "**Drug-Free School Locality through Crime Prevention Strategies – The Case of Kerala**". It must be several points of the article that I am concerned, it consists of:

1. For some points I found out Typographical errors. May the Authors could make up those minor-mistaken. However, it doesn't reduce substance of the Articles.
2. Abstract, within the paragraph of Abstract I am suggest the Authors to explain about Research Method. Also purposes of the research. Actually, it might help readers easier to understand. Considering all readers has their own discipline expertise, so Authors must write the Article in an easier way to understand.
3. In substances, it will be more comprehensive if Authors possible to explain about comparative studies or cases related to the issues itself.

This comment aimed to develop the article in a way of good and constructive matters. Furthermore, the article become sources for another authors who create other articles with related issues. Thankyou.

Best Regards,
