**Potential competing interests:** The author(s) declared that no potential competing interests exist.

- The paper can provide a contribution to the academic state-of-the-art regarding the topic.
- In the public transportation part of the study, If you add some studies that explain the relationship between COVID-19 and transportation very well, the study will be even more advanced. For this case, the studies named "Public transit usage and air quality index during the COVID-19 lockdown" and "Impact of COVID-19 on public transportation usage and ambient air quality in Turkey" can examine and add to the references to the study.
