Diazoaminobenzene

National Cancer Institute

Source

National Cancer Institute. *Diazoaminobenzene*. NCI Thesaurus. Code C44366.

An orange crystalline solid compound that is metabolized to benzene in vivo.

Diazoaminobenzene is used as a chemical intermediate, complexing agent and polymer additive and is a contaminant in several dyes used in drugs, cosmetics and foods.

Diazoaminobenzene is genotoxic in bacteria and rodents. It is reasonably anticipated to be a human carcinogen based on evidence of carcinogenicity in experimental animals.
