Eyelid Carcinoma TNM Finding v8

National Cancer Institute

Source

National Cancer Institute. *Eyelid Carcinoma TNM Finding v8*. NCI Thesaurus. Code C140470.

A finding about one or more characteristics of eyelid carcinoma, following the rules of the TNM AJCC v8 classification system. This classification system applies to all primary carcinomas of the eyelid, including basal cell carcinoma (BCC), squamous cell carcinoma (SCC), sebaceous carcinoma, and other rare carcinomas, such as all varieties of sweat gland carcinoma (e.g., eccrine carcinoma). It does not apply to carcinomas of the head and neck with direct extension to eyelid (are staged according to the cutaneous squamous cell carcinomas of the head and neck), Merkel cell carcinomas of the eyelid (are staged according to the classification for Merkel cell carcinomas), and melanomas of the eyelid (are staged according to the classification for melanomas of the skin). (from AJCC 8th Ed.)
