Review of: "Digital Literacy Skills of Teachers: A Study on ICT Use and Purposes"

Khairul Azhar Jamaludin[1]

1 Universiti Kebangsaan Malaysia

Potential competing interests: No potential competing interests to declare.

1. Title - the propsoed title is contradicting with the purpose of the study. It was stated that the main purpose of this study was to identify the challenges of ICT implementations in schools. Please revise.

2. Abstract - the methodology and findings of this research were unclear. Please revise.

3. Introduction -

- We are now in the 4IR, it is acceptable if you discuss the 3IR but please provide a continuation to 4IR and how it is related to the focus of your study.
- the references were mostly outdated. Please revise.
- the objectives were not identical as stated in the abstract and title. Please revise.

4. Literature review is too brief.

- What do you mean by education industry?
- The Digital Divide section can be improvised by reviewing the current education policy and its current implementation in schools.
- Please restructure the Pedagogical Approaches. It lacks of focus on "approaches".
- Digital Education and Policy Frameworks - what are the components for each framework? Please revise.
- Teacher Readiness - What do you mean by: "Teachers' readiness is also one of the leading scientific themes in teaching digital competencies in this region."
- 2.3.2- is this similar to 2.2.2? If yes, please combine.

5. The methodology section is poorly written. Please revise this section.

- What is the research design? and why you selected it?
- Is the instrument an adaptation from other study? If yes, please state its original source.
- What is the total number of population? How do you determine the sampling size?
- What is the sampling technique?
- How do you conduct the data collection?
- How do you analyze the data?

6. How do you interpret the mean and SD? what does the number means?

- It is suggested that you interpret the mean into levels.

7. Discussion

- What is the striking finding? And how it is different/similar to other studies?
- Revise how you discuss the findings. Justify why did you achieve such results in your study.

8. Conclusion - summarize the overall findings and provide some directions and implications of this study.
