Potential competing interests: No potential competing interests to declare.

The strengths of the article are original and interesting considerations consistent with the pattern of research. Solid methodology of the research with statistical analysis. Therefore, the contribution to existing knowledge is considerable. Also, the advantage of the research is perfect organization & readability. I cannot find the weaknesses of the assessed article. A model article worthy of imitation.

In general, it is an excellent article with exciting considerations that are consistent with the pattern of research. This is a very good review article with the analysis of statistics on the topic under study.

Overall evaluation: The article is suitable for publication in the current version.
