Dear authors,

Thank you for your paper. The paper deals with a very important issue for the world economy.

Even though I think the whole world knows who started the war, I believe that in a scientific paper, politics must be ruled out. Please change your Introduction, removing all politically charged sentences.

Hypothesis 1 has been well known for decades or centuries even.

When doing a literature review, the conclusion of this review at the end is needed. Also, indicate what and how your paper can help in the research thematic.

In the sentence "We get all the data for calculations from the websites: yahoo.finance, investing.com, and focus-economics.com," is this good enough to be treated as a good database?

When confirming a hypothesis, please indicate it in the text, because now the reader must look for the hypothesis proof.

Before the conclusion, my opinion is that one chapter where you describe all the findings of the paper and its results, together with hypothesis confirmation, is missing.
