Potential competing interests: No potential competing interests to declare.

There has been a significant improvement in the editing of the article. New and updated articles have been added. There has been a change in the article's introduction, but the conclusion section must be corrected. It needs to be at a sufficient level. In the conclusions chapter, there needs to be more references to the contributions and uniqueness of the research, and there is no reference to the limitations. Authors should provide a general commentary on the abstract, the article's unique contributions, study limitations, managerial implications, and the impact the article may have on future research and policy decisions. Limitations and future scope still need to be included.
