

Review of: "Acceptance of Childhood Rotavirus Vaccine Among Mothers at The Point of Rotavirus Vaccine Introduction: A case study from Awka Anambra State Nigeria"

Saadia Khan

Potential competing interests: No potential competing interests to declare.

I have gone through it in detail; good paper, adds and fills literature gaps from developing countries. Maternal awareness is key to prevention. Just the introduction needs a bit more elaboration. Keep it up.

Just add a paragraph regarding myths of vaccines.
