Potential competing interests: No potential competing interests to declare.

The article is interesting and brings a new approach. The title explains what the article says.

There are no abbreviations in the abstract, and it is necessary to indicate on which population the analysis was done. It is necessary to go to methodology to realise that the study was conducted on a group of students.

The article should be written in a more precise and more comprehensible way. The acronyms should be spelt out and clarified at the beginning. At the same time, it needs to be clarified whether SEI (social entrepreneurial intention) is the same as ESI (entrepreneurial social intentions). If so, use the same acronym throughout the paper.

In the bibliographical references, authors and works could be better cited. It is necessary to revise it in depth.
