Potential competing interests: No potential competing interests to declare.

1. An abstract typically provides a concise summary of the key points of a research paper, including the purpose, methodology, results, and conclusions. Please provide more details about the topic of the research. The first four sentences should be revised. At the end of the abstract, you can mention the potential application of your product.
2. The introduction section must be improved by providing a more comprehensive overview of the background and more details about the goals and objectives of your study.
3. Several sections within this manuscript lack proper references. It is crucial to substantiate each statement with appropriate documentation, citing relevant studies conducted by researchers such as Sapuan M.S., Ilyas R.A., Nurazzi N.M., and others, particularly those focusing on sugar palm composites.
4. Please add Section 2.3 focusing on epoxy resin as a reinforcement agent.
5. Please ensure the quality of the figure is high.
6. This manuscript is lacking in critical analysis of mechanisms in each property. The review should be much streamlined with reduced text on insignificant discussion.
7. It is advisable to engage the services of a professional native English language editor for thorough editing and improvement.
