

Review of: "Psycho-Emotional Impact of the First Wave of the COVID-19 Pandemic in Health Care Workers of a Large COVID-19 European Hospital"

Vandana Valluri

Potential competing interests: No potential competing interests to declare.

The authors may add how the study sample size was arrived at and what was the sampling strategy. Consider using a flow diagram. Add a note on missing data. Potential biases may also be addressed. Conclusion, in line with the objective (to assess the psychological distress experienced by HCWs engaged in COVID-19 wards in the early pandemic phase), would highlight the primary findings and serve the purpose.
