The quality of the paper is good. Comparison between P&O and FLC have been shown very clearly in the results. I would like to suggest few edits to the paper which are as follows :

Section	Comments
Section I	Literature Review should be mentioned in section I , in accordance to their appearance in the reference.
Section II	Indexing should be done according to paper format , if any . Instead of writing small points , paragraph can be used.
Section III	Properly format Table 1. Also , lref is not mentioned anywhere in Table 1. References should be mentioned in section I only.
Figure 5	Description of Figures should be exactly below the figure. Also ox and oy axes are not shown in Figure 5. Figure 5 is written Figure 3 in the description.
