Potential competing interests: No potential competing interests to declare.

The paper thoroughly examines the Southeast Asia Ministerial Forum, emphasizing its vital role in fostering regional cooperation and sustainable development in Southeast Asia. The article's comprehensive examination of the varied talks and conclusions made at the conference, particularly focusing on economic cooperation, sustainable development, and ASEAN's pivotal role in promoting collaboration among member countries, was a significant strength. This comprehensive coverage ensures readers understand the forum's contributions to tackling regional concerns. The paper emphasizes the necessity of collaborative tactics, partnerships, and information exchange in accomplishing sustainable development goals in the region, highlighting the significance of innovation and cooperation in driving progress.

The article's novelty is its correlation between the Southeast Asia Ministerial Forum results and their impact on developing English as a Foreign Language curriculum. The paper proposes a unique approach to integrating global and regional concerns into education, emphasizing critical thinking, problem-solving, and comprehension of regional institutions. This method is deemed innovative and appropriate for developing curricula in 2024.

To enhance readers' comprehension of the strategies, the article should have provided concrete case studies or successful instances of cooperative projects that demonstrate the practical application of theoretical approaches. Studying the barriers ASEAN states face in achieving sustainable growth and comprehending the intricacies of regional dynamics could significantly enhance the article on hindrances to AEC integration and competitiveness.

Challenges in implementation may arise from the need to balance regional and global viewpoints in the EFL curriculum to ensure its relevance in Southeast Asian contexts and worldwide applicability. Educators must create curricular content incorporating regional collaboration, ASEAN awareness, and global challenges into academic and professional writing to improve learners' impact on sustainable development and regional cooperation. Although novel, this strategy needs careful implementation and adjustment to cater to the varied requirements of learners throughout Southeast Asia.
