

Review of: "Fluvoxamine for Outpatient COVID-19 to Prevent Hospitalization: A Systematic Review and Meta-Analysis"

Rizaldy Pinzon

Potential competing interests: The author(s) declared that no potential competing interests exist.

This is a good systematic review. There is novelty in this review. The process of finding and appraising the studies in this review are very adequate. The systematic review came from only 3 trials, and 1 trials have weight more than 85%. It make the conclusion of this systematic review and meta analysis will be similar with the largest trial. The authors should mention how the disagreement between 2 reviewer will be resolved.

The result of this review is very promising. Further trails and review in this topic are warranted
