Review of: "Main countries contributing on Nanotechnology"

Swayamprakash Patel[1]

1 Charotar University of Science and Technology

Author of the present article have selected unique topic for determining country-wise contribution towards the nanotechnology using text-mining technology. Author have utilized VoSviewer and Voyant tool for it. The work itself have potential and I recommend it for publication after minor corrections / suggestions.

1. Kindly check all links provided. Few links are not opening. Make sure it remains accessible for longer run.

2. Suggestion: Author have incorporated word "nanotechnology" in WoS search bar. However, terms like "nano technology" and nano-technology" might be utilized in many articles in lieu of "nanotechnology". If author can incorporate them it will be even more comprehensive.

3. Suggestion: If possible, kindly implement text pre-processing to remove nontechnical terms like "using" from final clusters.
