Thank you for your research on Challenge in Old People Care in Nursing Homes during COVID-19 Pandemia: Role of Nurses. I have read the article with great enthusiasm and found the paper really interesting. The topic is timely and relevant to the present context where older people are particularly vulnerable during the COVID-19 pandemic. While the paper is well-structure, the only thing the author could have added, in my opinion is a brief statement of the method/technique applied to carry out the investigation. This would increase the rigor of the study. Otherwise, it is an excellent work.
