R-EPOCH Regimen

National Cancer Institute

Source

National Cancer Institute. *R-EPOCH Regimen*. NCI Thesaurus. Code C63461.

A regimen consisting of rituximab, followed by a continuous infusion of etoposide, vincristine and doxorubicin, given with prednisone and a bolus dose of cyclophosphamide, used for the treatment of aggressive forms of non-Hodgkin lymphoma, including mantle cell lymphoma.
