Gastric Cancer pT3 TNM Finding v7

National Cancer Institute

Source

National Cancer Institute. *Gastric Cancer pT3 TNM Finding v7*. NCI Thesaurus. Code C89838.

Gastric cancer with tumor penetrating subserosal connective tissue without invasion of visceral peritoneum or adjacent structures. The adjacent structures of the stomach include the spleen, transverse colon, liver, diaphragm, pancreas, abdominal wall, adrenal gland, kidney, small intestine, and retroperitoneum. Intramural extension to the duodenum or esophagus is classified by the depth of the greatest invasion in any of these sites, including the stomach. (from AJCC 7th Ed.)
