

Review of: "The Instances of Insomnia among Adolescents in High School Addicted to Online Games"

Daman Deep Kaur Gulati

Potential competing interests: No potential competing interests to declare.

Strengths:

- The research paper has strong theoretical framework.
- Research Design is absolute.
- There is a clarity of thought.
- Originality in ideas and presentation.

Weaknesses:

- P value is 0.026 so, it means there is a slight correlation between online gaming addiction and the instances of insomnia among adolescents
- Please, mention the statistical software used for the analysis
