

Review of: "Investigations on Input Impedance and Radiation Pattern of a UWB Antenna for Microwave Imaging"

Rahul Kumar Garg¹

¹ Institute of Electrical and Electronics Engineers (IEEE)

Potential competing interests: No potential competing interests to declare.

Paper lacks the theme of the design approach.

No information is provided on how the antennas were fabricated and measured.

The provided images are too large.

Parametric studies of the designs are missing.

The content of the abstract and article body does not fit properly; it requires revisions.
