Multilocular Cystic Renal Neoplasm of Low Malignant Potential

National Cancer Institute

Source

National Cancer Institute. *Multilocular Cystic Renal Neoplasm of Low Malignant Potential*.
NCI Thesaurus. Code C4524.

A rare kidney neoplasm of low malignant potential. It is a well-circumscribed multicystic mass without solid areas. The inner lining of the cystic structures is composed of clear cells. It usually presents as a unilateral solitary mass.
