

Review of: "Statistical Overview of Prevalence of Anaemia with Associated Socioeconomic and Demographic Factors in Nigeria"

Mohamadou Mansour

Potential competing interests: No potential competing interests to declare.

Abstract: Please provide a small background before the objectives

Research and objectives: Justify why you have selected women aged 15 to 29 years

Results and discussion: Please verify the frequencies of Tableau 3.1.

At what level of hemoglobin do you consider a participant as having anaemia?

Improve your discussion, please.

Congratulations to the authors for their efforts; the manuscript needs minor revision.
