Von Hippel-Lindau Peptide Vaccine

National Cancer Institute

Source

National Cancer Institute. *Von Hippel-Lindau Peptide Vaccine*. NCI Thesaurus. Code C2492.

A cancer vaccine composed of peptides derived from a tumor-associated protein encoded by a mutated Von Hippel-Lindau (VHL) oncogene. VHL peptide vaccine may stimulate a cytotoxic T cell response against tumor cells expressing the VHL tumor-associated protein. (NCI04)
