**Potential competing interests:** No potential competing interests to declare.

The article explores the concept of the soul, a quantum physics concept that determines all aspects of life. It suggests that spiritual talents like clairvoyance, telepathy, intuition, direct knowing, and psychokinesis can be explained by the soul, which is considered the essence of existence and capable of remote connections with other souls. The authors' approach is based on their theoretical and conceptual objectives rather than their empirical rigor, making it a daring and creative approach.
